

Project: Santos Moomba Plant - South Australia Big Lake Gas Facility

Client: Geotech

Outline the scope of the project: Remote Mobile Concrete Production

Value of the job: \$400,000

Eifers were asked to provide remote mobilisation of multiple pieces of equipment across 2000 kms to Central Australia.

We provided volumetric batching of 650m³ concrete for a compressor slab near Moomba in extreme weather conditions.

These time critical works were completed inside a six-hour window.

SCOPE OF WORKS

- Remote mobilisation of multiple equipment to Central Australia
- Coordinating with client to ship bulk concrete material over 2000 kms
- Site management
- FIFO
- Volumetric & batching of 650m³ fresh consistent concrete
- Fresh consistent concrete in very remote and extreme weather conditions
