

Project: Road Widening Hastings, Frankston-Flinders Rd

Client: Marksam Investments Pty Ltd.

Outline the scope of the project: Carry out essential road widening work at 2122 Frankston -Flinders Road, Hastings

Eifers was awarded and commissioned by Marksam Investments to carry out essential Road widening work at 2122 Frankston – Flinders Rd, Hastings.

Context: Our Client was building a new fuel station & to give access to the new property, they awarded us to build a new access road recognising our expertise in civil infrastructure projects & Major Road works, they entrusted us with the task to accommodate the need.

SCOPE OF WORKS

Site Preparation/Preliminaries: This includes establishing the site, setting out, environmental management, safety protocols, traffic management, provision of variable message signs (VMS), and materials testing in accordance with VicRoads specifications.

Demolition: This phase involves saw-cutting existing asphalt and concrete surfaces, breaking out and removing existing concrete kerb and driveway, and disposing of materials as required.

Earthworks: Supplying all necessary equipment and labour for excavation, shaping, filling, and consolidating the site, including disposal of excess material.

Concrete Works: Supplying materials and labour for various concrete constructions including footpaths, driveways, kerbs, laybacks, and island infills, all meeting specified standards.

Pavements: Construction of road pavements including rigid concrete pavement and flexible asphalt pavement, along with associated layers such as subbase, subgrade, and interfaces.

Drainage: Excavation and construction of drainage systems including culverts, pits, subsurface drainage, flush out risers, and drainage pits, meeting VicRoads standards.

Line Marking & Street Signs: Installation of the Line marking & the street signs to make sure appropriate traffic control measures are in place to guide motorists safely through the widened road and to comply with relevant traffic regulations and standards.

Overall, the project encompasses a wide range of tasks necessary for widening the road and establishing access to the new property, ensuring compliance with regulatory standards, and delivering a functional and durable infrastructure solution.
